Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 18-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on May 4, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 10 and 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Micro Lithography, Inc. (MLI) (<http://www.mliusa.com/products.htm#top>).

MLI discloses in the web site, an apparatus comprising a pellicle fused to a frame using a laser; and a reticle attached to the frame without using an adhesive.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-14, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over MLI.

MLI discloses the claimed invention as discussed above. Although MLI does not disclose fusing of the frame to the reticle, since MLI teaches fusing of the pellicle to a frame in order to keep the pellicle and frame clean, it would be obvious to one of ordinary skill in the art to fuse the frame also to the reticle in order to keep the system with pellicle, frame and the reticle clean. Although MLI does not disclose the order of fusing of the pellicle and the reticle, it would be obvious to fuse the pellicle, the frame and reticle in any order since the end result is both the pellicle and the reticle fused to the frame. Although MLI does not explicitly teach the type of laser used to fuse the pellicle, the frame and the reticle, MLI teaches using a laser. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to utilize different type of laser including infrared laser or a CO2 laser in order to fuse the pellicle, the frame and the reticle.
